Subject: Re: roof penetration

Use \$750 for this work. What is the status of all of the changes that Danny sent the email about yesterday.

Thanks, Kevin

Kevin, I talked to the owner about this. a 2" pipe will work. Stick with the double 90's. also make the pipe go through the roof and extend past the bottom of the bar joist so that way you can run a piece of all unistrut on pipe just below room and at the bottom of the bar joist.

This weatherhead will have a small antennae hanging from it and this will give it the support it needs.

What size pipe?

When you say weatherhead, the detail on the right is back to back 90 deg elbows. Depending on size you may need a support on roof.

Let me know so I can price

Thank You,

Kevin, please provide a price to me to provide this penetration, pipe, and weatherhead.
Naturally exclude all other work. Just get the pipe in for me.

Use the detail on the right.
